

BRINGING CUTTING-EDGE TECHNOLOGY TO AVIATION ABS

The Maples Group, a leading managing agent and fiduciary services provider to the aviation asset-backed securitisation ("ABS") sector, is partnering with **Aerlytix**, an innovative software platform. This strategic partnership will transform aviation ABS management by delivering unparalleled efficiency, accuracy, and transparency across every aspect of client operations.

To further elevate our service offering, we have integrated advanced accounting tools including **SunSystems**, **Unifi**, and **Datasnipper**. These cutting-edge solutions enable a seamless and efficient approach to managing aviation ABS transactions, facilitating process automation, enhancing data accuracy, and providing faster, audit-ready solutions for clients across the aviation leasing and finance sector.

Leading Innovation in Managing Agent & Cash Management Services

Our strategic approach, combined with advanced capabilities and extensive industry experience, positions us at the forefront of digital transformation in aviation ABS management. Leveraging our proven track record, we are reshaping service delivery and driving significant efficiencies in managing aviation ABS transactions, through next generation automation, streamlined processes and comprehensive reporting.

Why Choose Us?

From our offices in Dublin, we provide a complete, end-to-end suite of fiduciary, legal, management and entity services to the aviation finance industry. This includes managing agent, investor reporting, cash management, accounting and directorship services, together with corporate administration, as well as tax advisory and regulatory and compliance services. With over 530 staff in the Dublin office, the Maples Group is the leading legal and corporate services provider in Ireland by market share to special purpose vehicles and works with eight of the top ten global aircraft lessors.

Key Features & Client Benefits

Aerlytix

Transforming Aviation ABS

Pioneering Digital Innovation

Unparalleled accuracy and transparency, through automated reporting workflow, providing seamless connectivity and a single source of truth.

Excellence Through API

Seamless connectivity with external systems, streamlines operations, ensuring unified consistent data sets across platforms with enhanced oversight.

Measurable Results

Interactive dashboards offer instant insights, with precise cash flow modelling and tracking, and automated waterfall calculations to optimise performance.

SunSystems

Scalable Financial Management

Unmatched Flexibility

A highly adaptable platform for accounting and financial management, tailored to complex aviation ABS demands.

Real-Time Reporting

Instant insights into performance metrics to improve decision-making.

Seamless Integration

Works with all of Maples' existing systems to enhance operational efficiency.

Unifi

Optimised Data
Integration

Centralised Workflows

Brings all financial data into one hub for easier tracking and analysis.

Advanced Automation

Simplifies recurring processes such as reconciliations.

Enhanced Collaboration

Facilitates data-sharing across stakeholders securely.

Datasnipper

Smarter, Faster
Reviews

AI-Driven

Automates audit checks, saving time and eliminating manual errors.

Instant Data Validation

Snaps directly into spreadsheets, verifying accuracy with one click.

Audit-Ready Solutions

Precise, traceable results to support regulatory compliance.

“The Maples Group is dedicated to an investment in technology which supports our commitment to providing competitive market pricing combined with the highest standards of client service.”

Stephen O'Donnell, Global Head of Fiduciary
